

# Analysing Data From Goodreads

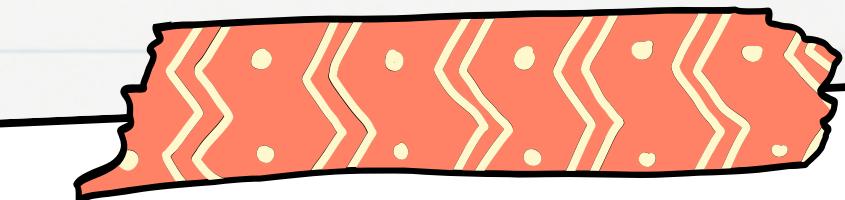

Presented by: Mahamed Abdulle

# Overview

- Introduction
- How Are Book Ratings Distributed?
- Do More Reviews Mean Better Ratings?
- Who has released most books this decade?
- Most reviewed books this decade (so far!)

# Introduction

## **What is Goodreads?**

- Goodreads is the world's largest platform for readers.
- It lets users track their reading, discover book recommendations, read and write reviews, and take on reading challenges.

## **How did I get the data?**

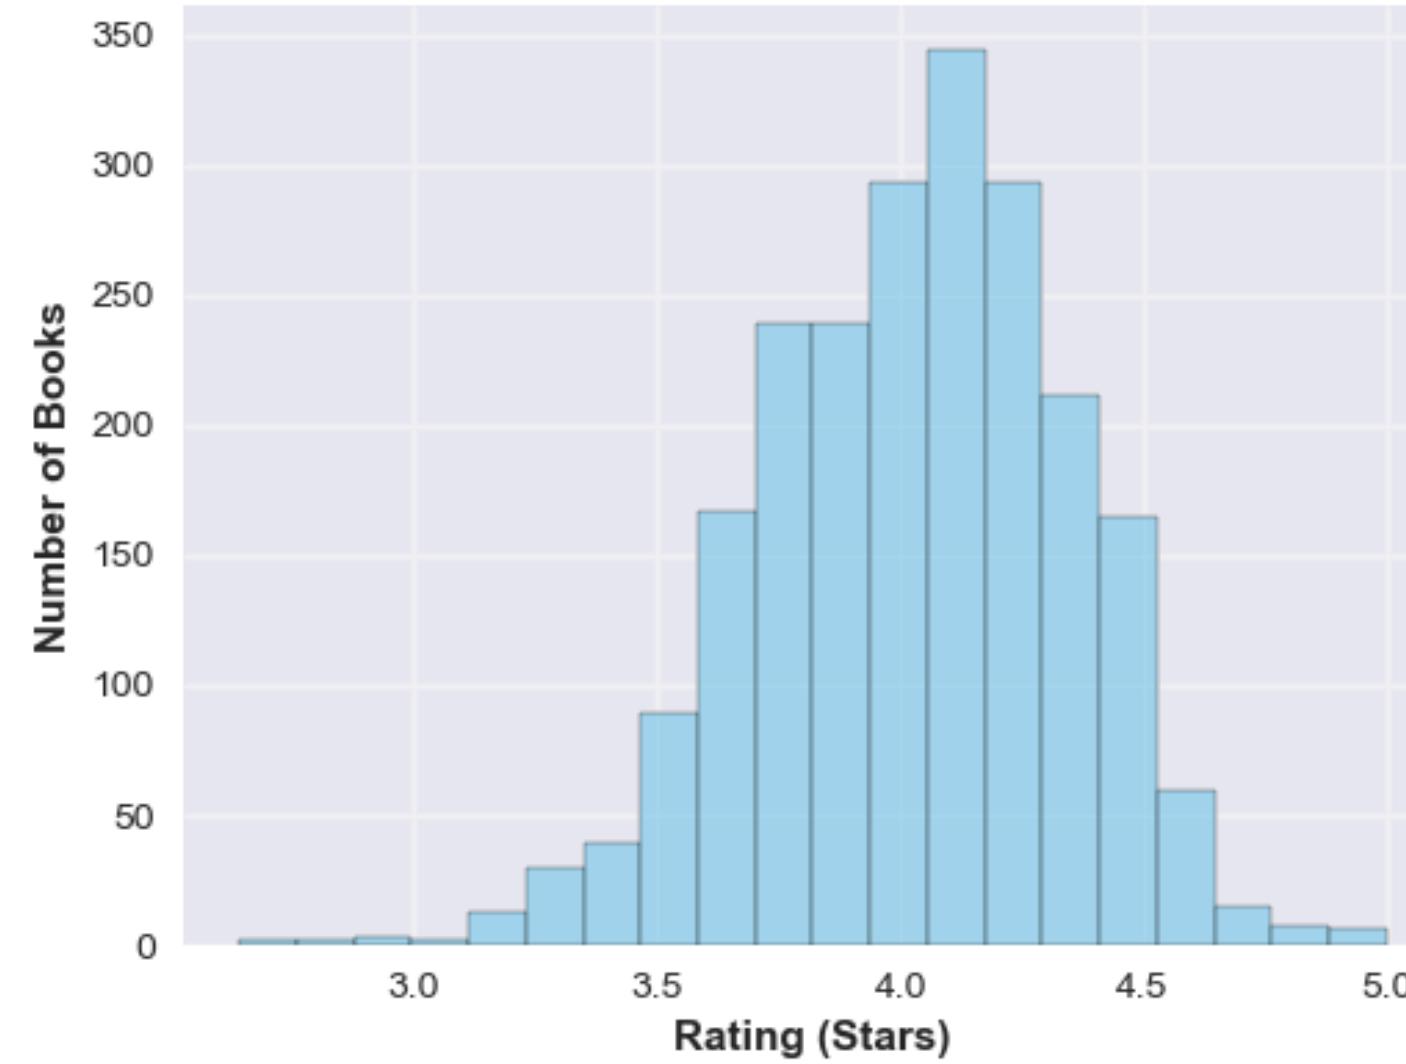

Web scraped the data from the Goodreads website

# How Are Book Ratings Distributed?

Distribution of Book Ratings

- Distribution of book ratings is approximately normal (bell-shaped)
- Centre of the distribution is around 4.0 stars
- Most books have ratings between 3.5 and 4.5
- Indicates generally positive reception towards books released this decade

# Do More Reviews Mean Better Ratings?

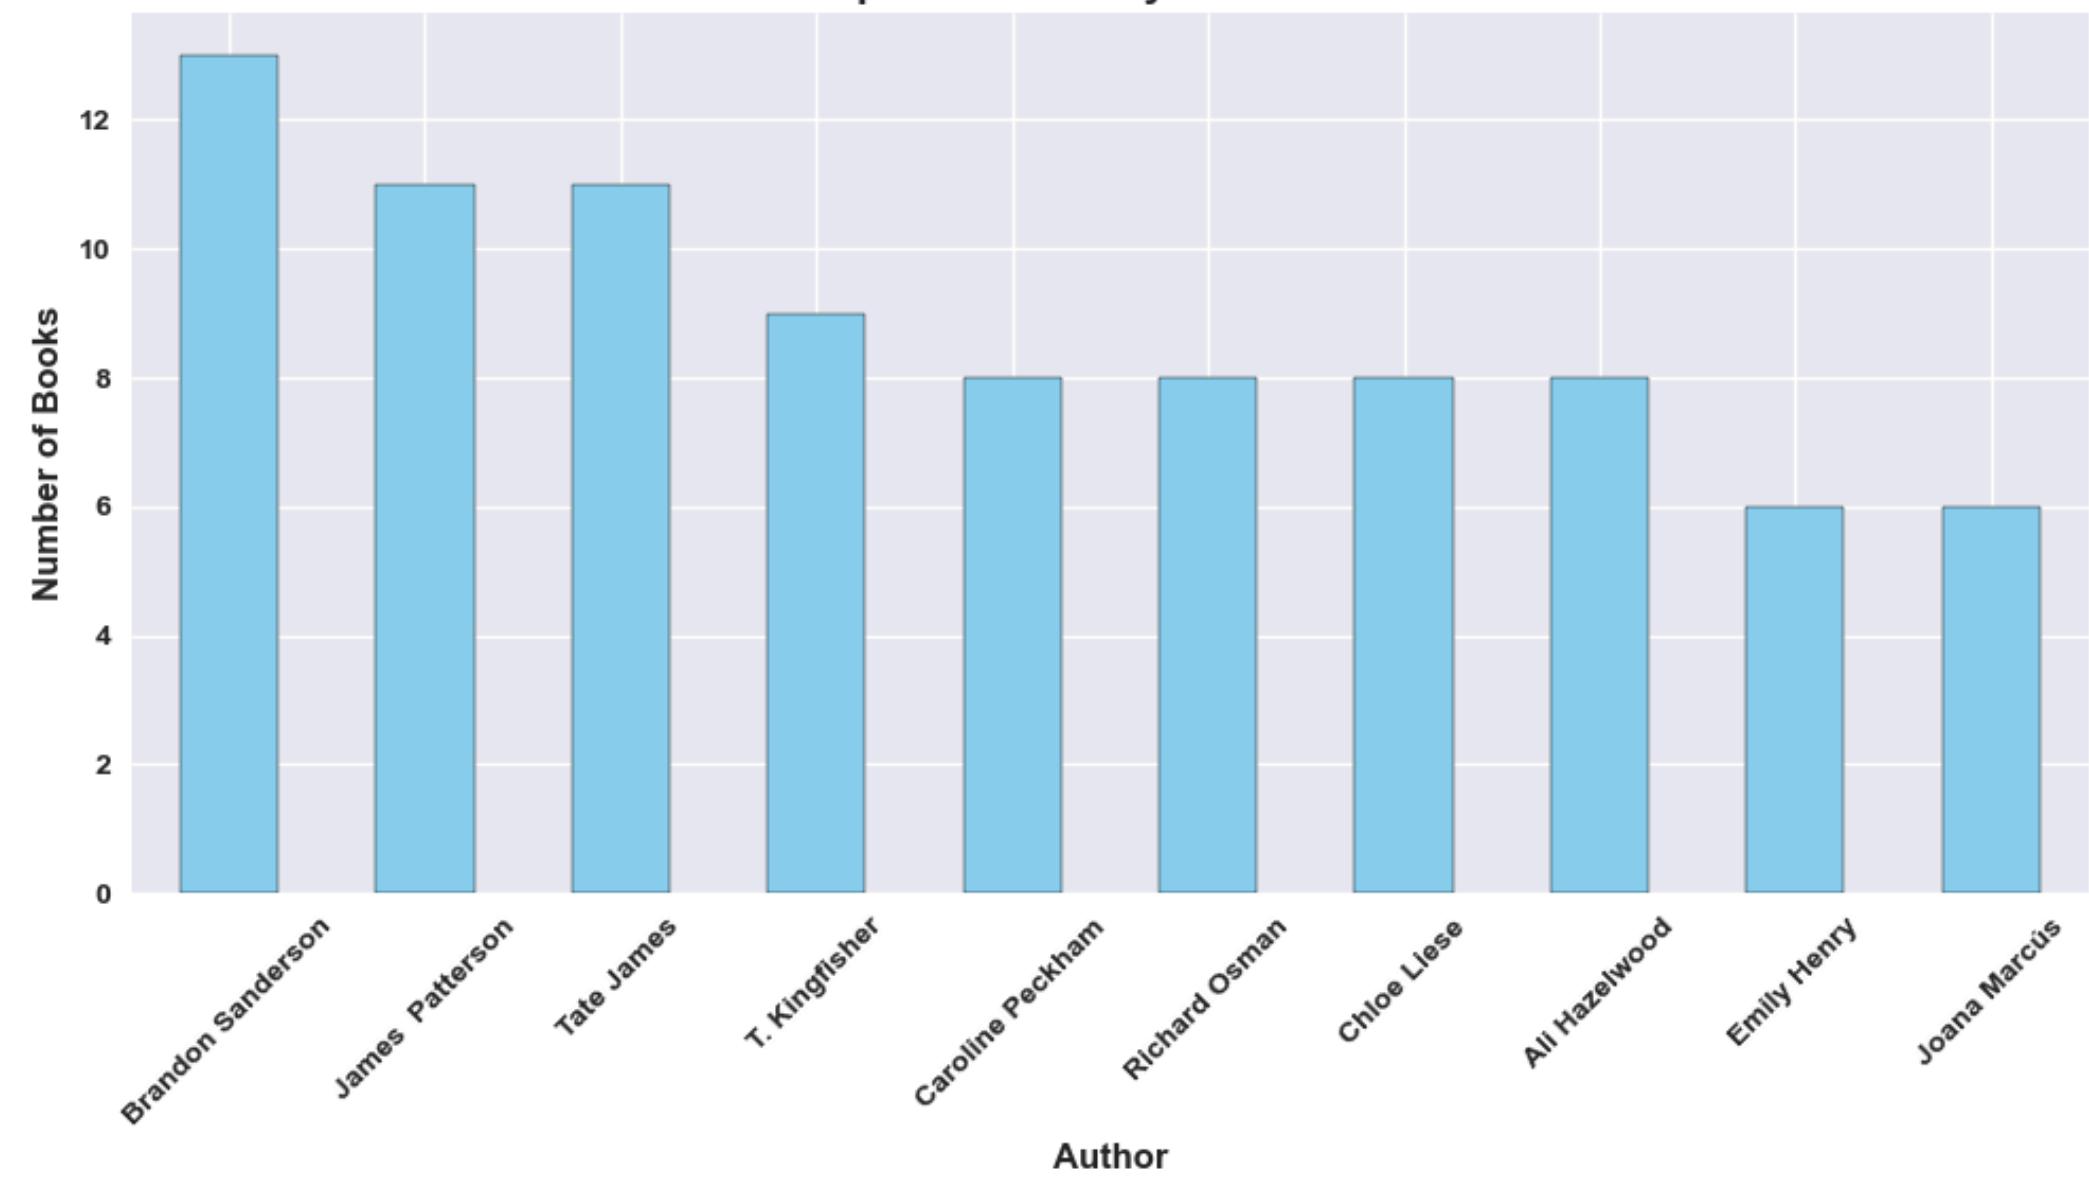

Similar to previous slide, in that most of data lies between 3.5 and 4.5 stars  
There is no clear correlation between the number of reviews and the rating the books gets.

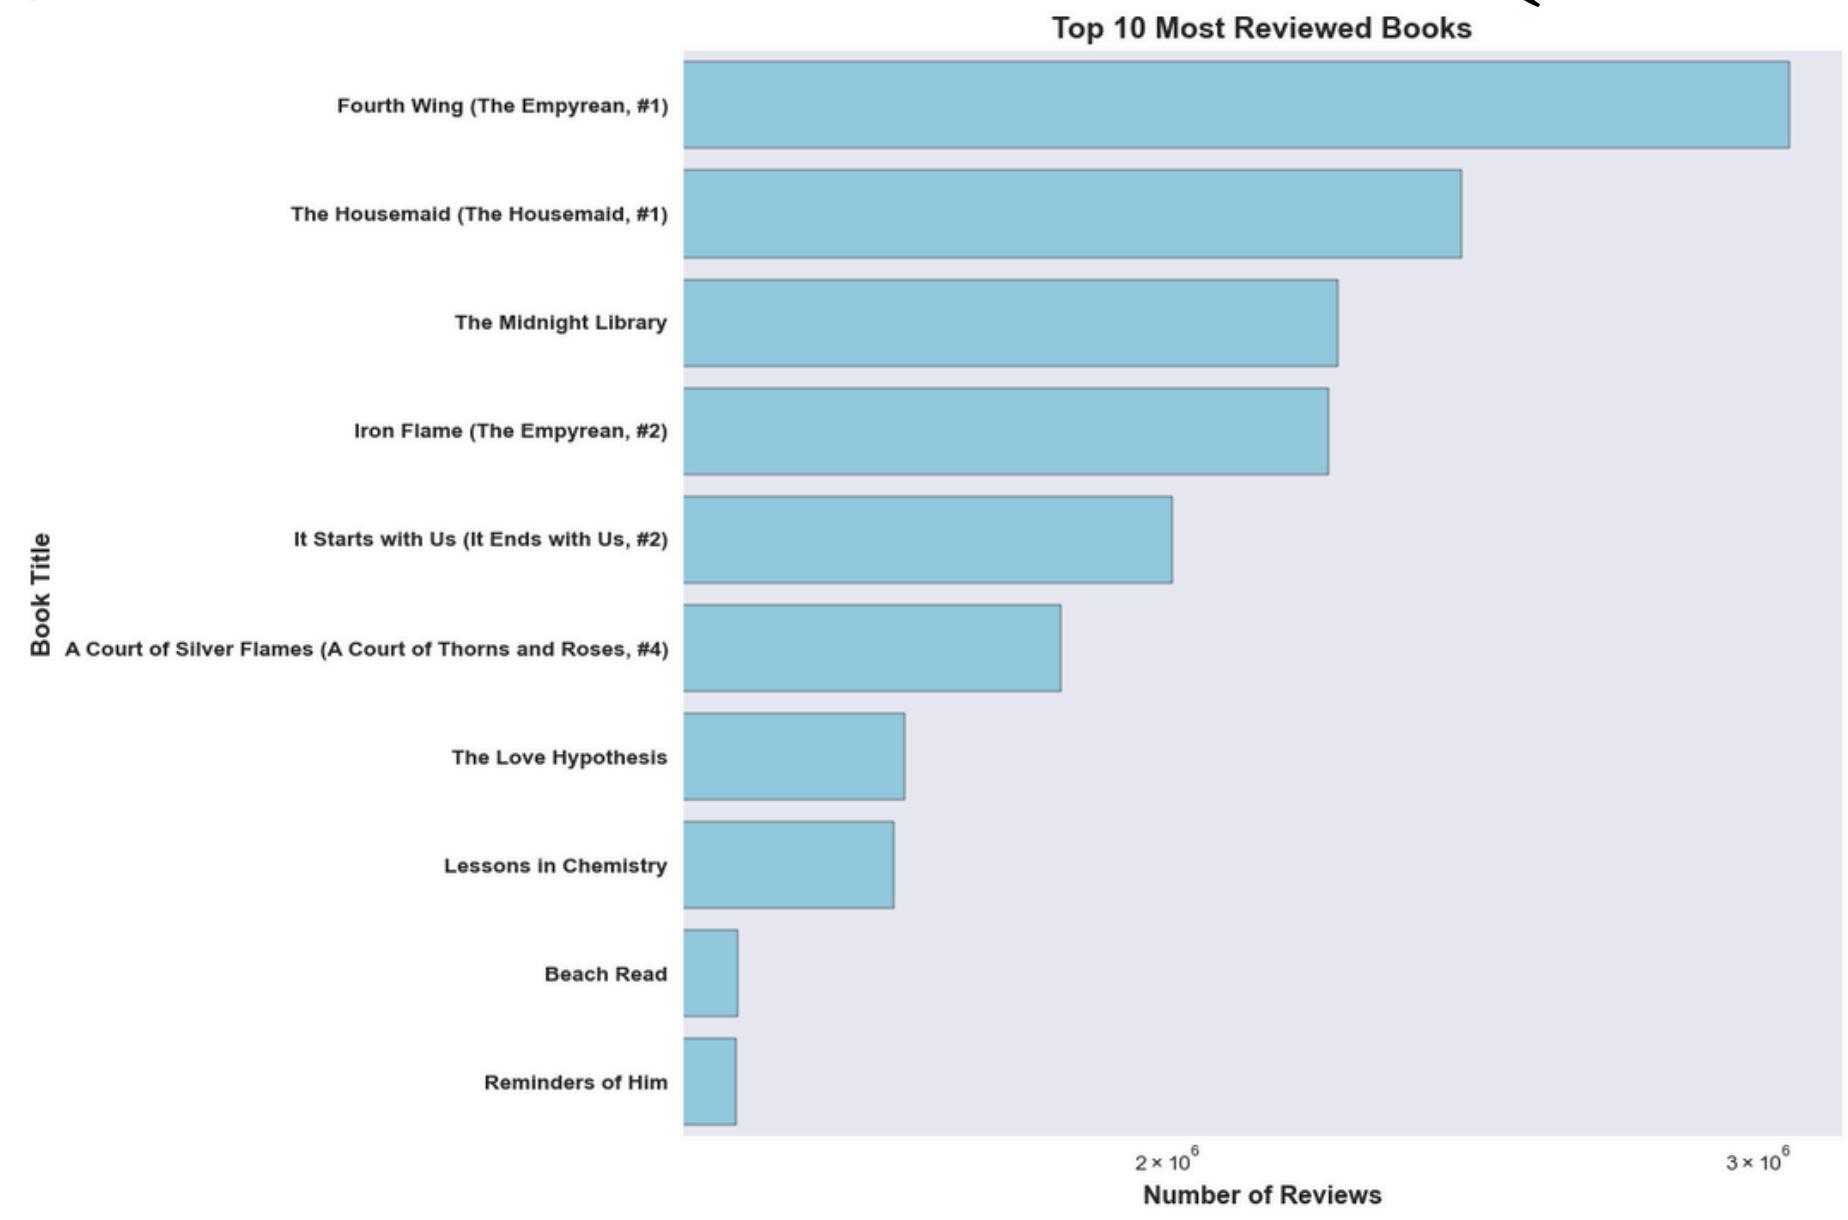

# Who has released most books this decade?

Top 10 Authors by Book Count

# Most reviewed books this decade (so far!)

# Conclusions

01

It would have been better if I was able to make better use of the genres of the books.
